

Downloading and Importing Tips and Tricks

If you are unable to download the file, try this tip. Open the email that was sent. Click on the link under “Download.” Unzip the file and import the files into your media player software or app. (like iTunes)

Downloads

Product	Expires	Download
Love Changes Everything - Download	December 12, 2020	Love Changes Everything

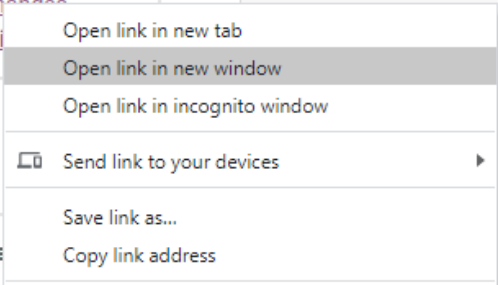

If that does not work, then right click on the link and select either “Open Link in New Window” or “Open Link in New Tab.”

Unzipping

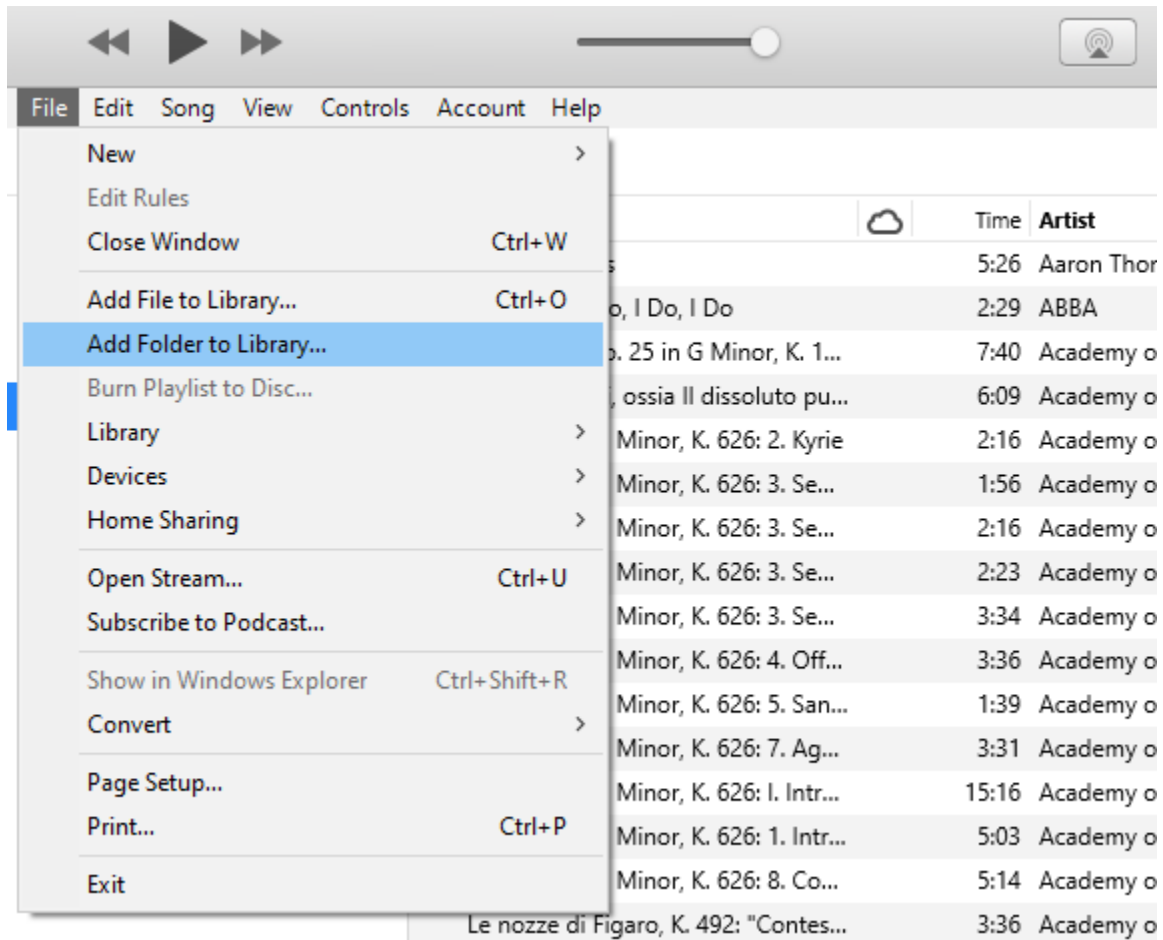

Most Operating Systems have a program to zip and unzip files. If you need one to download, try 7Zip or Winzip.

We suggest unzipping the files into a separate folder (rather than into your downloads or documents file) so they can be located easier.

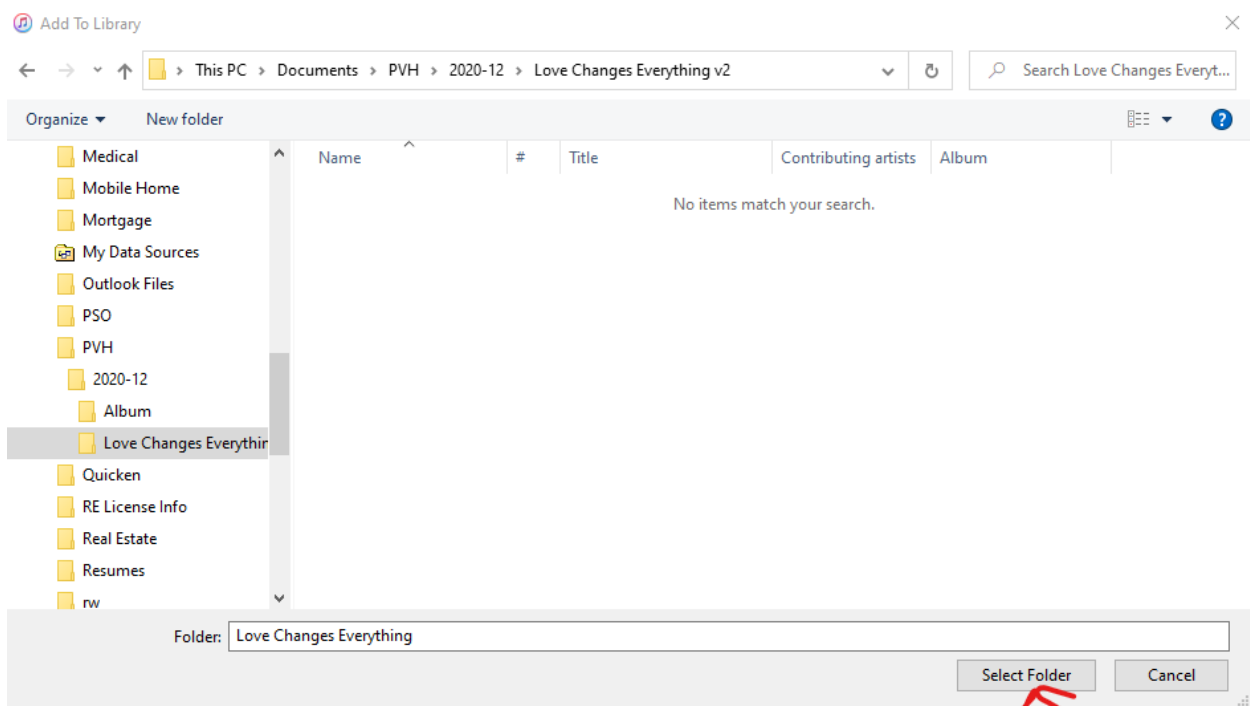

iTunes Import

These are instructions for a PC. For Mac, you will need to translate.

To add the files to iTunes, Select File and then “Add File to Library” or “Add Folder to iTunes.” If you are importing the entire album, you should use the Folder option.

Navigate to the folder Directory that you saved the files to:

Click "Select Folder."

The songs and album artwork should now import into the program.

You can also do this with individual tracks by adding the file instead of folder.
